

# OSTRA PLUS™

For Your Business

For teams that want expert-driven EDR protection, regular analyst syncs, and flexible controls they can grow into.

You've outgrown basic MDR. You want managed endpoint protection with tuning, telemetry, and actual people behind the screen. You want a partner who meets you in the middle — tuning detection logic, reporting trends, and helping your internal team stay sharp and in sync. That's what Ostra Core delivers.

With monthly threat ops reviews, managed EDR coverage, and flexible add-ons (phishing, awareness, VPN, vulnerability scanning), Core gives you more control without adding more tools to manage. It's the bridge between "doing everything in-house" and outsourcing your entire SOC; and it puts your goals at the center.

## Leverage Our Expertise

This is your full-service SOC. Detection, response, and strategy, all aligned to your environment, risk, and goals.

One Holistic Layered Solution

Expand Your IT/Security Team Capacity

Eliminate Security Gaps

Ostra believes everyone deserves best-in-class cybersecurity, not just big business.

## The Ostra Difference

### PROPRIETARY MESH ARCHITECTURE:

#### UNMATCHED PROTECTION

- Enterprise-grade protection, architected for simplicity
- Unified mesh design delivers layered security without complexity
- Built for flexibility, performance, and secure data sharing

### DATA RIVER:

#### UNMATCHED THREAT INTEL

- Always-learning threat intelligence engine powered by real-world telemetry
- Continuously enriched like an immune system – getting smarter with every signal
- Enabled by our mesh architecture and global sensor network

### HUMAN EXPERTISE:

#### UNMATCHED RESOLUTION

- Our cybersecurity analysts act as an extension of your team
- We don't just detect – we guide, remediate, and resolve
- Deep analyst and research bench fuels faster decisions and better outcomes
